

KART KLEEN LLC. dba BIG SKY DECON

CAPABILITIES STATEMENT

Big Sky Decon is a solution-oriented, innovative company that manufactures products that use UV irradiation to destroy the physical structure of DNA and RNA genomes of bacteria, viruses, fungi, and protozoa that are present on objects and surfaces we encounter during our daily routines. Our products improve public safety by decontaminating contaminated areas and inanimate objects frequently used by people in their daily activities that can transmit viral and bacterial diseases.

CORE COMPETENCIES

- Ultraviolet Light Decontamination Product Manufacturer
- Professional Decontamination Services
- Portable and Durable Decontamination Units
- Multiple Different Patented Decontamination Units

DIFFERENTIATORS

Our products use science-based Ultraviolet Germicidal Irradiation (UVGI) to decontaminate and remove dangerous pathogens. The UVGI process significantly reduces bacterial growth after treatment.

- Uses 10x the required strength to inactivate bacteria and viruses without chemical or ozone risks.
- Safe, effective, and proactive in maintaining health and safety standards.
- Capable of removing bacteria and viruses such as COVID-19, MRSA, E. Coli, Salmonella, C. Diff, and more.
- Effective against contaminants including blood, saliva, sweat, fecal matter, and other potential disease-carrying substances.
- Big Sky Decon's narcotic treatment reduces the amount of recoverable fentanyl to essentially zero on microfiber articles and over a 90% reduction rate on vinyl materials.
- Made in America

COMPANY SNAPSHOT

Established: 2018

CAGE: 8DD32

UEI: XFGPPENSLY83

Accepts Credit Cards

NAICS AND PSC

NAICS CODES:

335999 - All Other Miscellaneous Electrical Equipment and Component Manufacturing

334517 - Irradiation Apparatus Manufacturing

325612 - Polish and Other Sanitation Good Manufacturing

561720 - Janitorial Services

PRODUCT SERVICE CODES:

F108, H179, J079, J083, J084, Q901, S201, S299
